

**To the Chairperson
Award Committee
Zayed Foundation for Human Fraternity
Abu Dhabi
United Arab Emirates**

Ref: Letter to prove eligibility to support The Nomination of Dr. Ismail Serageldin

Dear Members of Award Committee,

As head of an international NGO of significant repute that counts no less than ten former heads of State and government in its Board of trustees and that has a broad international outreach, I believe that I am eligible as a nominator.

The Nizami Ganjavi International Center (NGIC) strives to be a center of cultural radiance, an institution of national culture with an international mission, encompassing academic studies of the great poet and sage Nizami Ganjavi and his legacy, and also maintaining and organizing an active involvement with the contemporary world, where we act to nurture intercultural dialogue, learning, tolerance and understanding, and the promotion of the values of peace, justice, human rights and shared societies. Our activities involve many members of the international elite among decision-makers, Nobel Laureates, and technical specialists. We are committed to the promotion of the values of diversity, human rights, equality and justice. Global peace, security and multilateralism. Ismail Serageldin is a tireless advocate and defender of these values, and was one of the founders of the NGIC. also. He is a truly amazing person (see his CV) who is widely respected throughout the world who has received decorations from many countries, including the emperor of Japan, the French Republic and the government of Chile. A distinguished academic, he has received forty honorary doctorates from around the world.

Based on the criteria laid down by your side, as being a head of International NGO, I strongly believe that I am qualified to be a nominator for the Zayed Award Human Fraternity.

If there are any questions, I may be reached at the number +994 51 388 18 44 or rovshan.muradov@nizamiganjavi-ic.org.

Rovshan Muradov

**Founding Secretary General
